Instruction of hanging wallpaper

GENERAL INSTRUCTIONS

Only use rolls which show the same production number. Check the quality of the roll before cutting. Do not cut the rolls when you discover a mark or defect, but inform your supplier immediately. If before or during the cutting, some faults or irregularities show up, the supplier cannot be held responsible for a quantity of max. 3 lengths. Claims above more than 3 lengths cannot be accepted. Labour costs and possible damages cannot be refunded. Start creasing the paperback in advance while hanging.

SURFACE PREPARATION

Make sure that the surface is smooth, solid and free of dust. Remove all dirt, grease, wallpaper or wallpaper and especially the traces of glue. Use a roller to polish or smooth walls. Fill up holes and smooth down.

CUTTING OF LENGTHS

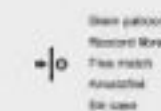

Cut the sheets to size (height of wall + seam). This avoids wall cover any differences caused by starting floors or ceilings. When cutting, no design is lost. Make sure that the design matches correctly. Only cut the round and following lengths, after they have been put in register* beside the sheets already cut.

ADHESIVE

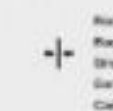

Only use a good quality paste following manufacturer's instructions. Soaking time about 5 minutes.

HANGING

Apply wallpaper, but first, stretch with stretching bar or roller. Do not use a steam roller. Remove surplus paste by dabbing with a damp sponge or cloth. Avoid excessive heat or draught while the paper is drying.
